SUMMARY

Computer Science student with knowledge of full-stack development and experience building small projects. Focused on strengthening core concepts through hands-on practice and problem-solving.

EXPERIENCE

Studyzone365 (Study2Win Pvt Ltd) | AI Engineer & SDE Intern

- Conducted AI and analytics research to support product development and identify technical solutions.
- Led frontend development of the company website and designed coding and study abroad course curriculum.

Vybout | React Native Developer Intern

- Built and shipped mobile & web features using React Native, React.js, Next.js, and PostgreSQL across the full product lifecycle.
- Developed reusable cross-platform UI components and integrated frontend systems with backend APIs.
- Gained hands-on early-stage startup experience working end-to-end in fast-paced, high-velocity teams.

DreamHitch | Social Media Content Intern

- Created multi-format social content, drawing on 5+ years of independent content-creation experience.

PROJECTS

Budget Buddy | Full-Stack Personal Finance App

[Live Demo](#) | [Github](#)

Stack: React 18, Vite, Tailwind CSS, Recharts, Node.js, Express, Prisma ORM, PostgreSQL (Neon), JWT

- Built and deployed a full-stack finance app with React (Vercel), Express (Render), and PostgreSQL (Neon).
- Implemented JWT authentication, role-based access control, and transaction CRUD with filtering, search, and pagination.
- Built interactive analytics dashboards using Recharts with budget tracking and visual spending alerts.

[Live demo](#) | [Github](#)

DawnBox | AI-Powered Developer Intelligence Dashboard

Stack: Next.js, Tailwind CSS, Zustand, FastAPI, LangGraph, SQLAlchemy, Groq (Llama 3.1), PostgreSQL, JWT

- Built and deployed a full-stack developer productivity app aggregating GitHub and Gmail notifications into a unified AI-curated feed
- Designed a multi-step LangGraph pipeline using Groq's Llama 3.1 to score urgency, assign action tags, and generate morning briefings.
- Implemented JWT authentication with FastAPI and async SQLAlchemy ORM for secure, efficient backend data handling.
- Added background task processing for non-blocking pipeline execution across feed aggregation and AI summarization.
- Built a dark-mode dashboard with priority-sorted feed, AI explanations per item, and a morning briefing panel.

CORE CAPABILITIES

- **AI-Native Development:** Claude Code, Cursor, Codex / GitHub Copilot, Kiro, Antigravity. AI-assisted architecture, LLM, refactoring, and code generation across the dev cycle.
- **Frontend Development:** React 18, React Native, HTML5, CSS3
- **Backend Development:** Node.js, Express.js, REST API Design, JWT Authentication.
- **Databases & ORMs:** Neon, MongoDB, MySQL, Prisma ORM.
- **Languages & Problem-Solving:** JavaScript, TypeScript, Python. Data Structures, OOP.

CONTINUOUS LEARNING & COURSEWORK

- **CS50: Introduction to Computer Science** (Harvard/edX): foundational CS, algorithms, memory management, and problem-solving across C, Python, and SQL.
- **The Odin Project** (Full-Stack JavaScript Path): HTML, CSS, JavaScript, Node.js, Express, databases, and deployment, practiced through hands-on project builds.
- **JavaScript30 by Wes Bos:** 30 vanilla JavaScript projects covering DOM manipulation, browser APIs, and framework-free patterns.
- Active reader of **MDN Web Docs**, **React docs**, and **Prisma docs**; ongoing LeetCode practice for DSA fluency.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Expected May 2028

Newton School of Technology, Rishihood University, India

Class XII (Senior Secondary), 90% | Class X (Matriculation), 93%

Spoken Languages: English, Hindi (native), German (A2, actively learning).
